

AirFlare Quick Start for Dispatchers

February 9, 2020

Field Console Version:

Android: 1.4.190604

IOS: 1.4.190604

Detector Software Version: 2.2.6

Purpose

Use in conjunction with [AirFlare Web Console User Guide](#) to onboard dispatch personnel to AirFlare Search Technology. (i.e. intended for dispatchers responsible for using AirFlare Web Console to conduct searches – but who are not responsible for configuring AirFlare Detectors for field deployment). This onboarding sequence is designed for in classroom training, self-learning, or in a mock search scenario.

Resources required:

1. Desktop Computer with Internet Browser
2. Search Device* (IOS or Android) with Field Console installed
3. Lost Subject Device* (IOS or Android) with the AirFlare (adventurer-side) app installed.

** Same device can be used for Search Device and Lost Subject Device for this tutorial.*
